

What is changing?

C+D Learning and Update Plus will be moving to the C+D Community from August 1, 2021.

Why is Update Plus moving?

C+D is moving the learning modules to the C+D Community to offer customers a richer learning experience.

What changes will I notice?

Our CPD and learning content will be so much easier to use, will have a brand-new look and feel, and will give you access to exciting new resources.

New Features:

- **Bite-sized learning courses** - for optimum engagement and retention
- **Learn on the go** - pause your learning and return to it at anytime
- **Track your progress** – to better manage your study time
- **Access additional resources** – for the most comprehensive and up-to-date information
- **Access experts** – connect with your peers to take your learning to the next level

What will happen with my existing learning record?

Historical learning records will not be transferred to the C+D Community, therefore we are asking customers who wish to have access to this information to go into their learning record, download it and save it locally to their personal drive before August 1, 2021.

How do I download my existing learning record?

Watch the video from the CPD section [here](#) to download your learning record.

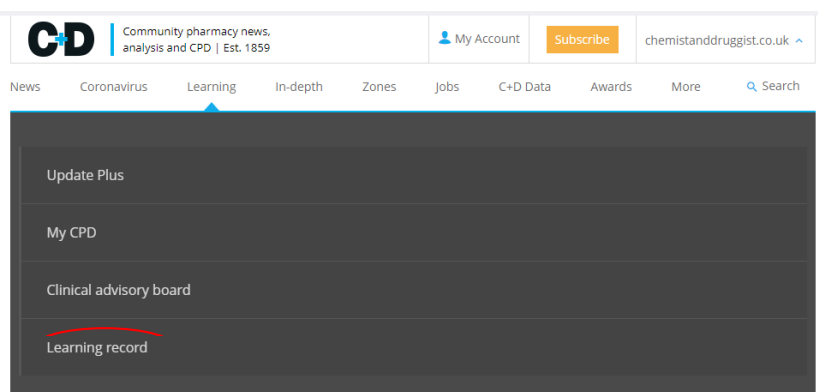

C+D CPD Users FAQs

Or follow these steps:

Navigate to the learning record from C+D

<https://www.chemistanddruggist.co.uk/learning-record>:

Select your PDF log:

And save it to your chosen location:

What if I don't have time to download my learning record?

C+D will be downloading all of the historic learning records as a backup, and will be able to share your learning record with you on request, where necessary.
